One day, fifteen years after "The King of Iron Fist Tournament 2," a communiqué was sent to Heihachi Mishima, the leader of the Mishima Financial Empire. The report brought the ominous news that his "Tekken Forces" had been obliterated after encountering a mysterious being called "Ogre."

Soon after receiving this news, martial arts masters from around the world began disappearing. In the midst of Heihachi's concerns about the missing fighters and Ogre, a young man appeared before him.

His name was Jin Kazama. He claimed to be the son of Kazuya Mishima, whom Heihachi himself had taken to the grave during the last Tournament. In a more startling revelation, Jin said that his mother, Jun Kazama, had been attacked by Ogre and vanished.

All of these events convinced Heihachi that Ogre thrived on the powerful souls of the vanished masters. He also believed that harnessing Ogre's powers could bring immense strength to the Mishima empire.

And thus Heihachi taught the art of Mishima Style Fighting Karate to young Jin.

Jin's discipline and abilities were strengthened like steel under the intense training, driven by the desire for revenge upon the beast that took his mother's life.

Four years have passed, and Heihachi acknowledges Jin's impressive fighting prowess.

And now, he announces "The King of Iron Fist Tournament 3" – with Jin as a lure to draw Ogre out into the open.

 - "○ + ⊗" means press the listed buttons at the same time.

STEP-IN/STEP-OUT

Advance → or retreat ← quickly.

Indispensable for setting up your own moves and for avoiding the enemy.

RUN

Get close in a hurry to a far-away enemy. If you run into your opponent while running, you can deliver a *dash attack*.

MOVE SIDEWAYS

Doing this repeatedly will allow you to circle around to your enemy's flank.

GAME CONTROLS

ATTACKING

Left Punch —  Right Punch — 
Left Kick —  Right Kick — 

In *Tekken 3*, these buttons correspond to the character's four limbs; use these for the most basic attacks.

Combine these buttons in different combinations with the Directional Buttons for more varied attacks.

TYPES OF ATTACKS

Attacks in this game are divided into three categories depending on what part of your enemy's body you wish to hit: high, mid, and low range.

High Range Attacks.....Hits standing enemies. Will not hit crouching enemies, and will not cause damage to enemies performing standing guard.

Mid Range Attacks.....Hits both standing and crouching enemies. Cannot be blocked unless performing standing guard.

Low Range Attacks.....Hits both standing and crouching enemies. Can be blocked by crouching guard, or avoided by jumping over them.

Utilizing these attacks in response to your enemy's position is the secret to winning. The attack technique used by each character is different, so watch out!

DASH ATTACKS

Tackle——Run into the enemy after 3 or more steps.

Knock the enemy over with your weight and then sit on them – while punching, of course.

Running Cross Arm——  +  After running 3 or more steps.

Fly into your enemy with a mid-level cross-chop.

Sliding Dash——  After running 3 or more steps.

Slides right into your enemy's legs. When Yoshimitsu or King performs this move, it becomes a killer technique.

Unblockable Tackle——Run into the enemy after 4 or more steps.

Performs a shoulder tackle that cannot be blocked and cannot be counter-attacked.

Super Charger——  +  +  + 

Holding down all four attack buttons at once temporarily gives your character extra attack power. All attacks performed from this state cause extra damage against even a guarded enemy. However, you are left defenseless during the power up.

GAME CONTROLS

GUARDING

Standing Guard

Guards against upper and mid-range attacks, but is not a defense against low range attacks and throws.

Crouching Guard

Guards against low range attacks. Also protects you from most upper range attacks and throws. Does not defend against mid-range attacks.

AUTO-GUARD

Your character will guard after being attacked using the standing guard if the Directional Buttons are not being pressed and crouching guard if they are pressed down. However, auto-guard is not effective against repeat attacks and some kinds of throws.

UKEMI (QUICK ROLL)

Into the background \square or \triangle Into the foreground \times or \circ

If you perform an *ukemi* maneuver with just the right timing, you can recover and get up quickly when you are knocked down to the ground. This move will enable you to roll away from your opponent either into the background or foreground depending on the button that is pressed. Note that this move is tricky to pull off. When you are about to fall, hit the buttons repeatedly to execute the move. But, be careful, you won't be able to perform an *ukemi* move when you fall face down on the ground or get attacked by certain moves or throws.

THROWS

Basic Throw

$\square + \times$ or $\triangle + \circ$

In general, throws are attacks carried out while holding onto the enemy. Throws leave you vulnerable momentarily but they cannot be guarded against and cause great damage. Learn to use them well for skillful playing.

There are 3 throws which all characters share: the front throw, the left/right throw, and the back throw, all depending on where you are in relation to the enemy. If the enemy is crouching or on the ground, he cannot be thrown. Individual characters are capable of special throws, too.

ESCAPES

Basic Avoid Throw

\square or \triangle

If you use this command at just the right moment as your enemy tries to throw you, you can slip through the enemy's hands like water.

Against a front $\square + \times$ throw use \square , and against a $\triangle + \circ$ throw use \triangle to escape from a throw. To avoid left/right throws, use the punch command for the direction from which you're being grabbed to avoid the throw. You cannot get out of a back throw once the enemy has you. The way to get out of special character technique throws differs with each technique.
